

## Task 2.5

### Model Adjustments:

- Added picture attribute
- Limit description field to a maximum of 600 characters

### Website Inspo 1: Epicurious

I like the thin banner image and the use of opacity on the search input field. When I add log-in and search features I would like to emulate this.

## Website Inspo 2: Delish

I like the simplicity here of having just a picture in one column and name in the other column of each row. I have modeled my Recipe list page after this.

The screenshot shows a web browser window for the Delish website. The header includes the Delish logo, navigation links for DINNERS, RECIPES, FOOD NEWS, COCKTAILS, and TIPS & TOOLS, a search bar, and buttons for SUBSCRIBE and SIGN IN. Below the header, a teal banner spans the width of the page. The main content area features a section titled "APP ATTACK" with the subtext "These are guaranteed to get your party started." Below this, there is a grid of six recipe cards, each with a small image and the recipe name:

- Stuffed Mushrooms
- Vegan Butternut Squash Potstickers
- Sausage Balls
- Baked Feta Bites
- Cranberry Whipped Feta Dip
- Smashed Potatoes

On the right side of the grid, there is a promotional box for the Delish Newsletter with the text "delish Hungry for more? Get the Delish Newsletter." and a "CLICK HERE TO SUBSCRIBE" button.

## Website Inspo 3: Yummly

I like the use of border-radius here to warp the shape of recipe pictures. I have done something similar in both my recipe-list and recipe-details templates.
